| List PWS ID #s for all Community Water Systems included in this CCR |
| The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. You must mail, fax of email a copy of the CCR and Certification to MSDH. Please check all boxes that apply. |
| Customers were informed of availability of CCR by: (Attach copy of publication, water bill or other) |
| ☐ Advertisement in local paper (attach copy of advertisement) |
| ☐ On water bills (attach copy of bill) |
| ☐ Email message (MUST Email the message to the address below) |
| A Other Copy mailed to each customer |
| Date(s) customers were informed: 05/30/2017 / / / |
| CCR was distributed by <u>U.S. Postal Service</u> or other direct delivery. Must specify other direct delivery methods used |
| Date Mailed/Distributed: 5/30,2017 |
| CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / / |
| ☐ As a URL (Provide URL) |
| ☐ As an attachment |
| ☐ As text within the body of the email message |
| CCR was published in local newspaper. (Attach copy of published CCR or proof of publication) |
| Name of Newspaper: |
| Date Published: / / |
| CCR was posted in public places. (Attach list of locations) Date Posted:/_/ |
| CCR was posted on a publicly accessible internet site at the following address (<u>DIRECT URL REQUIRED</u>): |

CCR Deadline to MSDH & Customers by July 1, 2017!

2016 Annual Drinking Water Quality Report Town of Sledge PWS ID# 0600008 May 2017

We are pleased to present to you this year's Annual Drinking Water Quality Report. This report is a snapshot of last year's water quality. Included are details about from where your water comes, what it contains, and how it compares to standards set by regulatory agencies. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water and to providing you with this information, because informed customers are our best allies. Our water source is groundwater. Our wells draw from the Lower Wilcox Aquifer.

A Source Water Assessment has been completed for our public water system to determine the overall susceptibility of the drinking water supply and to identify potential sources of contamination. The general susceptibility rankings assigned to each well of this system are provided immediately below. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water supply and is available upon request. The wells for The Town of Sledge have received to moderate susceptibility rankings.

If you have any questions about this report or concerning your water, please contact Mayor Julie Branch at 662. 382-7716. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held at 6:00 P.M. on the first Monday of each month at Town Hall.

We routinely monitor for over 150 contaminants in your drinking water according to Federal and State laws. The table below lists all the drinking water contaminants that we detected in the last round of sampling for the particular contaminant group. Unless otherwise noted, the data presented in this table is from testing done January 1 through December 31, (2016). As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. All drinking water, including bottled water may be reasonably expected to contain at least small amounts of some constituents. The presence of contaminants does not necessarily indicate that water poses a health risk

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Parts per million (ppm) or Milligrams per liter (mg/L) - One part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter (ug/L) - One part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Action Level (AL) - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

1

TEST RESULTS

| Inorganie | Contaminants |
|----------------|---------------------|
| A 11 O F PARTY | COMMUNICATION OF |

| Contaminant (units) | Sample Date | MCL Violation Y/N | Your Water | Range Low High | MCLG | MCL | Likely Source of Contamination |
|---------------------|----------------|-------------------------|---------------|----------------------|------|-------|---|
| Arsenic (ppm) | 2016 | N | 0.0008 | NO RANGE | 0 | 0.010 | Erosion of natural deposits; runoff from orchards, runoff from glass and electronics production wastes |
| Barium (ppm) | 2016 | N | 0.013 | NO RANGE | 2 | 2 | Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits |
| Chromium (ppb) | 2016 | N | 0.0007 | NO RANGE | 100 | 100 | Discharge from steel and pulp mills; erosion of natural deposits |
| Fluoride (ppm) | 2016 | N | 0.183 | NO RANGE | 4 | 4 | Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories |
| Selenium (ppm) | 2016 | N | 0.004 | NO RANGE | 0.05 | 0.05 | Discharge from petroleum refineries; erosion of natural deposits; discharge from mines |

Lead and Copper Contaminants

| Contaminant (units) | Sample Date | Your Water | # of sites found above the AL | MCLG | MCL | Likely Source of Contamination |
|---|----------------|---------------|--|------|--------|--|
| Copper (ppm) (90 th percentile) | *2014 | 0.4 | 0 | 1.3 | AL=1.3 | Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives |
| Lead (ppb) (90th percentile) | *20 [4 | 3 | 0 | 0 | AL=15 | Corrosion of household plumbing systems, erosion of natural deposits |

Disinfectants and Disinfection Byproducts Contaminants

| Contaminant (units) | MCL/MRDL Violation Y/N | Your Water (AVG) | Range Low High | MCLG | MCL | Likely Source of Contamination |
|--|------------------------------|------------------------|----------------------|--------------|-------------|---|
| TTHM (ppb) [Total Trihalomethanes] | N | 292 | NO RANGE | N/A | 80 | By-product of drinking water chlorination |
| HAA5 (ppb) [Total Haloacetic Acids] | N | 2.0 | NO RANGE | N/A | 60 | By-product of drinking water disinfection |
| Chlorine (ppm) | N | 0.70 | 0.42 - 1.01 | MRDLG = 4 | MRDL = 4 | Water additive used to control microbes |

^{*}Most Recent Sample. No sample required for 2015

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any samples prior to the end of the monitoring period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service

lines and home plumbing. The Town of Sledge is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead. The Mississippi State Department of Health Public Laboratory offers lead testing for \$10 per sample. Please contact 601.576.7582 if you wish to have your water tested.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

The Town of Sledge works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.
